

## IMPORTANT INFORMATION ABOUT ELECTRIC VEHICLE PARKING PERMITS

*Electrical Vehicle (EV) parking permits are issued in accordance with the City's Special Memorandum of Understanding on Commute Options and Parking ("Parking MOU"). Please be aware of the following in using your permit to park your electric vehicle:*

- (1) EV permits are issued on a space-available basis in accordance with the terms and provisions of the Parking MOU. Parking permit fees do not apply to EV permits. Please visit our website at <http://per.lacity.org/commuter.htm> for details on how to obtain an EV permit.**
- (2) EV permits are only granted for zero emission ("ZEV") vehicles as identified by the California Air Resources Board Eligible Vehicle List; vehicles designated as partial zero emission ("TZEV") do not qualify for City-issued EV permits.**
- (3) An EV permit provides access to the parking garage/lot for which the permit was issued, but does NOT provide a guarantee or right to charge a vehicle at that garage/lot.**
- (4) Different City-owned or leased parking facilities may or may not have charging facilities available. EV permits will be available only for parking facilities that have charging stations. Charging at these facilities is available only on a first-come-first-served basis. The maximum time allowed to charge a vehicle is two hours.**
- (5) The Department of Energy provides resources for electric vehicle drivers to search for charging stations at [http://www.afdc.energy.gov/fuels/electricity\\_locations.html](http://www.afdc.energy.gov/fuels/electricity_locations.html)**
